## Lenzing ramps up production in China again to full capacity

Sbt: Supply bottlenecks eliminated. All production lines back to full operation.

Nanjing – Following its temporary cutting back of production at the Nanjing site in China, Lenzing has now once again ramped up operations on all production lines to reach full capacity. Recently supply shortages of important raw materials arose as a result of intense transport controls in connection with the current situation surrounding the coronavirus. For this reason, output from two production lines was scaled back for a short time. All production lines are now fully operational again after the successful resumption of the required supplies to the manufacturing facility.

**About the Lenzing Group**

The Lenzing Group stands for ecologically responsible production of specialty fibers made from the renewable raw material wood. As an innovation leader, Lenzing is a partner of global textile and nonwoven manufacturers and drives many new technological developments.

The Lenzing Group's high-quality fibers form the basis for a variety of textile applications ranging from elegant ladies clothing to versatile denims and high-performance sports clothing. Due to their consistent high quality, their biodegradability and compostability Lenzing fibers are also highly suitable for hygiene products and agricultural applications.

The business model of the Lenzing Group goes far beyond that of a traditional fiber producer. Together with its customers and partners, Lenzing develops innovative products along the value chain, creating added value for consumers. The Lenzing Group strives for the efficient utilization and processing of all raw materials and offers solutions to help redirect the textile sector towards a closed-loop economy.
