

Feel-good fibers for tampons

Lenzing fibers are ideally suited for sensitive applications. Tampons made from Lenzing Viscose® and Lenzing Viscostar® offer pure comfort and confidence.

Cross section of Lenzing Viscose® 2.8 dtex / 30 mm dull

Lenzing Viscose®

Lenzing Viscose® has been the fiber of choice for more than 50 years. It has been developed in close cooperation with the market. This has enabled Lenzing to continuously improve the properties of its viscose fibers over the years.

Lenzing Viscose® is made from the renewable raw material wood. Their cellulosic origin makes viscose fibers naturally absorbent. Beyond this, we strictly monitor the manufacturing process to ensure the cleanliness and purity of our fibers.

A further advantage of Lenzing Viscose® is its processability: Compared to cotton, it is easy to open and handle.

Lenzing Viscostar®

Tampon manufacturers guarantee specified absorption values for their standard sizes. These values are measured according to the Syngina test.

For super absorbent tampons we have developed Lenzing Viscostar® which enables Syngina values far beyond those of regular viscose. This can be achieved by the special trilobal cross section of the fiber.

Feel-good fibers for tampons

Product range

The following tampon fiber types are available:

- Lenzing Viscose® 2.8 dtex / 30 mm dull
- Lenzing Viscose® 3.1 dtex / 40 mm dull
- Lenzing Viscostar® 3.3 dtex / 30 mm bright

Using Lenzing tampon fibers enables manufacturers to tailor the performance of their products according to the requirements of the market. This can be achieved by simply varying the blend ratio of Lenzing Viscose® and Lenzing Viscostar®.

Safety for sensitive end uses

Lenzing fibers for tampons comply with the EU and the US Pharmacopoeia as well as FDA regulations. Beyond this, Lenzing Viscose® and Lenzing Viscostar® meet the requirements for a medical device registration. The conformity with these regulations certainly increases the confidence of our customers.

In harmony with nature

Being based on cellulose Lenzing Viscose® and Lenzing Viscostar® are a sustainable choice. On the one hand cellulose is being produced from the renewable raw material wood. On the other hand Lenzing fibers can be disposed with a clear conscience since they are fully biodegradable.
